

Dahle Shredder DEMO Reveals Major Benefits to Healthcare Clinic - Reduced Noise & Efficient Shredding...

CLIENT NEED

A Healthcare Clinic uses shredders purchased from local office superstores on a daily basis. HIPAA Compliancy officers, administrators, doctors and clerks found these shredders to be loud, inefficient and needed to be replaced on a frequent basis.

Recent legislation such as the Fair and Accurate Credit Transactions Act (FACTA), Health Information Portability Act (HIPAA), and the Gramm-Leach-Bliley Act (also known as The Financial Services Modernization Act), have brought an increase in the awareness of the need to properly dispose of sensitive information before recycling. Shredding has become the recommended method for the handling of sensitive documentation.

MY OFFICE PLANNING GROUP SOLUTION:

A local *My Office Planning Group* dealer delivered a DEMO unit for the Healthcare Clinic to use for 2 - 3 Weeks. The Dahle Crosscut Shredder unit was small and lightweight. Throughout the DEMO trial most of the doctors, many of the administrators and lots of the clerks had an opportunity to feed paper through it, and ultimately decided it was the right unit for them.

51 Shredders were installed in the clinic. Efficient, quiet and effective here's what the clinic had to say after the demo:

"This crosscut machine is much quieter and more efficient than the strip shredders we've been buying from the office superstore"
